Josee Madison Keynote Speaker | Self-Awareness Expert | Founder & CEO, Élan Alliance

Bio

Ever replayed a conversation or sent a text your wiser self would've deleted? You're Josee Madison's kind of person. An international keynote speaker and awareness strategist, Josee speaks on what pressure does to smart, capable people. As the creator of Wired to Wise™ and WAM™ (Wired Armor Mode), she translates neuroscience and human behavior into practical tools for better decisions, clearer communication, and stronger leadership.

Her perspective was shaped by high-pressure environments, from serving as executive assistant to a Federal Court judge to managing international music tours and entrepreneurship. With more than 17 years of independent studies and professional training and certifications in human behavior, nervous system energetics, neuroscience, yoga and other disciplines, she brings science, humor, and her own "well, that wasn't my finest moment" stories to help leaders recognize when their protective reactions are running the show.

Being accomplished doesn't mean you never get defensive. It just means you might have a very convincing explanation for it.
